## DERMAPEN SKIN MICRONEEDLING

Dermapen Skin Microneedling is one technology that has been proven to deliver amazing results.

The treatment is a form of collagen induction therapy where a series of tiny needles penetrate the skin at a vertical angle using a specialist medical device, for faster and more precise needle penetration. The procedure causes thousands of micro-injuries, which leads to increased collagen production, effectively repairing scars, reducing discolouration and renewing tired looking skin.

The Dermapen has revolutionised micro skin needling, making it easier, safer and less painful to get maximum results compared to traditional derma roller skin needling. The results are more extraordinary, longer lasting and treatment time is faster, making this a top choice for anyone looking to achieve younger, smoother and firmer skin.

The deep dermal heating enhances collagen production, which effectively smooths the appearance of fine lines and wrinkles, and dramatically tightens loose and sagging skin.

Unlike some advanced skin treatments that can be a little uncomfortable at times, the NuEra Tight is very relaxing and has a similar sensation to that of a hot stone facial massage.

## ADVANCED BLEMISH REMOVAL

### FACIAL THREAD VEIN TREATMENT

Medically referred to as Telangiectasia but commonly known as broken capillaries, red veins or spider veins.

We effectively treat facial thread veins simply and easily using Lynton IPL (intense pulsed light, similar to laser) or by Thermolysis, using Sterex Advanced Electrolysis.

Both treatments are a safe, effective way to banish thread veins. The treatment option best for you will be determined during consultation.

We are also able to remove Blood Spots (medically referred to as Campbell De Morgan or Cherry Angioma) and Spider Naevi (central dilated blood vessels with small capillaries radiating from it), using the same methods.

**TREATMENT FROM £90**

### MILIA REMOVAL

Milia are small, hard, white raised bumps or spots, which lie superficially under the skin. They are normally found around the eye area and cheeks but can appear anywhere on the face or body.

We quickly, safely and effectively treat milia using one of two methods; Diathermy or Needle Extraction.

**FROM £45**

### SKIN TAG REMOVAL

Skin Tags are small, brown or flesh-coloured growths (usually a couple of millimetres to 5cm in size) that hang from the surface of your skin. They are made of loose collagen fibres and blood vessels surrounded by skin and can look like warts or raised bumps.

Although skin tags are common, they are completely harmless and do not usually cause any pain or discomfort. However, they can snag on clothing or jewellery and bleed as a result, and can also lower your self-esteem.

We safely remove unwanted skin tags in many areas of the body using advanced electrolysis techniques with Sterex technology.

**FROM £95**

For more in-depth information and FAQs on these skin concerns and treatment, please visit our website.
